Data Notes

Agricultural Overview

This bulletin covers 27 agricultural industries in the State of California. The number of industries ranges from five to seventeen within each of the six geographic regions. The regions are the San Joaquin Valley, South Coast, Desert, Central Coast, Sacramento Valley, and North Coast (refer to map for details).

The data are organized into the following tables by state and region:

- Wage and Salary Workers
- Average Hourly Earnings

Summary

Employment

California agricultural employment for July 2001 increased 300 jobs over the previous month. Total Agricultural Production decreased 1,400 jobs from June 2001 to July 2001, a decline of one percent. Agricultural Services increased by 22,200 jobs, a gain of one percent. Changes in agricultural employment from June to July vary from year to year. The change in California agricultural employment from June 2000 to July 2000 was a decrease of 3,800 jobs.

Dairy Farms registered the largest gain for the month with an increase of 6,600 jobs. Gains of 3,900 were registered in both Vegetable/Melon and Ornamental/Floral/Nursery Crops. The largest decrease was registered in Berry Crops with a loss of 8,300 jobs. Total agricultural employment increased 13 percent in the North Coast Region, nine percent in the Central Coast Region, three percent in the San Joaquin Valley Region, and one percent in the Sacramento Valley Region. Agricultural employment decreased 37 percent in the Desert Region while the South Coast Region was unchanged.

Production and Crop Activity

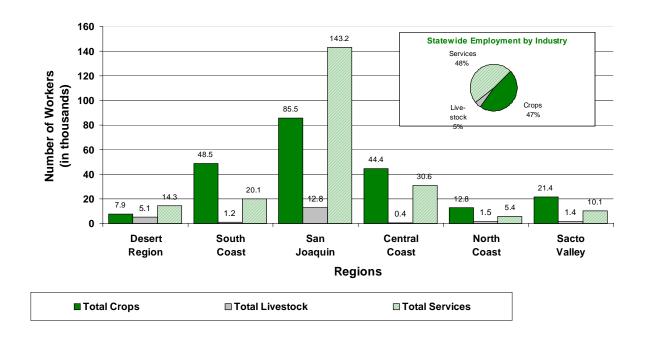

Crews were thinning and weeding cotton fields in some areas while others were being cultivated and treated for mites. The harvesting of wheat and barley continued. Straw was baled and stacked. The cutting, windrowing, and baling of alfalfa hay also continued as Sudan grass was cut, dried, baled and stacked. Grain stubble was disced or used for sheep grazing. Many alfalfa growers were irrigating and treating fields for weeds and armyworms. Cornfields were irrigated and treated for mites. Silage corn was harvested in some areas. Harvesting of garbanzo beans and sugar beets was active. Other sugar beet fields were treated for weeds. Aerial herbicide applications were ongoing in rice fields. Shade cloth was put up to prevent sunburn on larger varieties of fresh market tomatoes. Summer vegetable fields were irrigated and treated for insect pests. Cantaloupes, honeydews, and watermelons were harvested and packed in the San Joaquin Valley. Harvested melon fields in the Imperial Valley were disced for suppression of white fly populations. In the Sacramento Valley and Stockton Delta regions, tomato and melon fields were treated for aphids, mites, cucumber beetles, loopers, and worms. Southern California carrot fields were treated for weeds. The San Joaquin Valley onion harvest was in full swing. Fresh market garlic was being picked up after drying in the fields. The celery harvest was active and early-planted fields of sweet corn were harvested. Other vegetables harvested during the month included basil, beets, bell peppers, broccoli, carrots, cauliflower, cilantro, collards, cucumbers, eggplant, garlic, green beans, green onions, lettuce, okra, parsley, hot peppers, spinach, squash, tomatoes, and zucchini.

Fruit growers continued cultural activities that included weed control, and fungicide applications. Grapes were treated for fungal diseases and insecticides were applied. Grape harvesting continued in the Coachella Valley while the harvest of peaches and other stone fruits accelerated in the San Joaquin Valley. Post harvest pruning began in some stone fruit orchards. Insecticides and fungicides were applied to apple trees and gala variety apples were harvested. Grapefruit picking was active in Riverside County and the harvesting of Valencia oranges continued. Pear harvesting was active in the Sacramento Delta and San Joaquin Valley. Lemon harvesting was active in the South Coast Region. Walnut orchards were treated for weeds, blight, and codling moth. Almond growers supported limbs to bear the weight of heavy nut set.

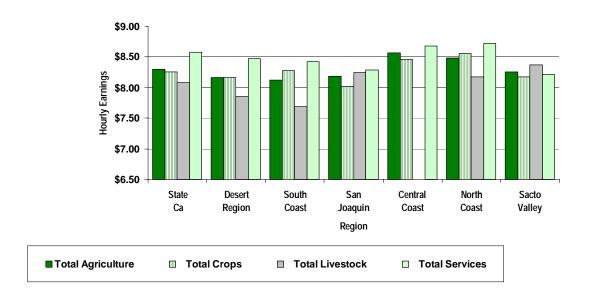

Range cattle were fed supplemental hay as needed. Evaporative coolers and fans were used on chicken and turkey ranches to reduce heat losses. Bee activity continued in vegetable fields and hives were placed in vineseed, alfalfa seed, and safflower fields.

Agricultural Summary Charts

DATA NOTES

Data Sources:

These data are obtained from two sources: the Employment Development Department (EDD) Covered Employment and Wages (ES-202) data files and a monthly survey conducted by the California Agricultural Statistical Service (CASS) of the U.S. Department of Agriculture (USDA) and the Labor Market Information Division of EDD of 4,200 agricultural employers. The sample was selected to be representative of the state's agricultural employers by size, geographic location, and industry categories. Sample data are gathered for the survey week that includes the 12th calendar day of the month. All data in this bulletin represent activities taking place during this mid-month period. Same month prior year employment data are benchmarked to the ES-202 data files maintained by EDD.

Data Comments:

To aid in accurate usage and interpretation of the data, please note the following:

- Agricultural Services employment survey data may be recalculated; historical trend information is used to adjust sample data when low response rates occur.
- Regional data may show greater variability than statewide data because of small sample size and variable reporting patterns in specific industries.
- Current month regional estimates are based on the recorded addresses of owner-operators. Same month prior year regional data are based on worksite locations. Significant differences between regional current month and same month prior year data could result, although statewide totals might be comparable.
- Where data cannot be estimated because of inadequate sample reporting, the letters "na" have been entered into the
 field to indicate estimates are not available.
- Wage data include wages of supervisors and hired non-production workers (primarily administrative personnel). Piece rate data are also included where applicable.
- Fishing, forestry, and hunting industry data are not included in the Agricultural Services estimates. Unique seasonal industry patterns of employment make producing employment estimates for these industries problematic.
- Employment data do not include employers of unpaid family workers.
- Agricultural workers who are employed by farm labor contractors are reported in Agricultural Services under that
 industry category. Employment levels in Crop Production and Livestock Production do not reflect their activities in the
 associated industries that contract with the farm labor contractors.
 - Total agricultural employment and hourly earnings estimates in this bulletin are derived from the monthly Current Employment Statistics for Agriculture project. Estimates in this bulletin will differ from other agricultural estimates published by EDD and the USDA because of differences in the number of industries covered and in the definition of agricultural workers.

Subscriptions:

Annual subscriptions are available for \$30.00 per year. Ask for publication number LAU-15. To subscribe or for information, please call (916) 262-2162 or write to:

Employment Development Department Labor Market Information Division Publications Information Unit 7000 Franklin Blvd., Building 1100 Sacramento, CA 95823
